PROFESSIONAL SUMMARY

Cybersecurity student with hands-on experience in web application security, responsible vulnerability disclosure, embedded security research, and Linux-based environments. Built practical experience through Hack The Box, TryHackMe, HackerOne, and self-hosted security labs. Currently expanding into SOC operations through threat detection, log analysis, SIEM technologies, and incident response while actively developing defensive security projects.

EDUCATION

MIT World Peace University (MIT-WPU)

B.Tech in Electronics & Communication Engineering (ECE), AI/ML Specialization

Pune, India

Expected Graduation: May 2028

EXPERIENCE

Research & Development Intern

PHN Technology Pvt. Ltd.

Jan 2025 – May 2025

Pune, India

- Contributed to the research and development of IoT, embedded systems, and cybersecurity-focused solutions using ESP32, Raspberry Pi, and platforms.
- Performed vulnerability assessments and security testing for embedded and web-based applications using industry-standard security methodologies.
- Assisted in developing ESP32 and Raspberry Pi-based IoT security prototypes.
- Documented security findings, testing procedures, and mitigation recommendations for internal R&D projects.

Independent Security Research Projects

2024 – Present

HackerOne Bug Bounty Platform

Remote

- Actively perform web application security assessments across public bug bounty programs on HackerOne.
- Practiced identification of Broken Access Control, IDOR, Authentication, GraphQL and API security issues.
- Documented testing methodology and findings to improve vulnerability assessment workflow.

President

Aug 2025 – Present

Hack-X, Cybersecurity Club – MIT World Peace University

Pune, India

- Lead the university cybersecurity community by organizing Capture The Flag (CTF) competitions, workshops, and technical events.
- Coordinate club operations, executive members, and technical initiatives promoting hands-on cybersecurity learning.

Assistant Sponsorship Executive

Sep 2023 – Sep 2024

STeRG, MIT World Peace University

Pune, India

- Managed sponsorship outreach and coordinated with industry partners to support technical events and student initiatives.

PROJECTS

Responsible Disclosure – IDOR in University ERP Portal | Burp Suite, Web Security

July 2024

- Identified an Insecure Direct Object Reference (IDOR) vulnerability affecting the university ERP portal by manipulating student PRN identifiers.
- Demonstrated unauthorized access to student profile resources using Burp Suite by modifying PRN parameters.
- Assessed impact using CVSS v3.1 methodology and prepared a detailed proof-of-concept with remediation recommendations.
- Responsibly disclosed findings to the university administration.

ESP32 Marauder Custom Firmware | ESP32, PlatformIO, Embedded C++

2025

- Customized ESP32 Marauder firmware for wireless security experimentation by integrating NRF24L01 support, OLED interface, and custom menu navigation.
- Implemented embedded firmware enhancements using PlatformIO and ESP-IDF libraries for wireless security experimentation.
- Worked with SPI, I2C, and RF communication modules during firmware development.

SECURITY PLATFORMS

Google Developer Program: g.dev/Alcesozdst – skills profile with earned gamified badges

Hack The Box: [cybersecurity researcher profile](#) – skills in Weak Authentication, Misconfiguration, Reconnaissance

TryHackMe: tryhackme.com/p/AlcesOzdst **HackerOne:** actively hunting on live programs for security assessment

TECHNICAL SKILLS

Security: Burp Suite Professional, Nmap, Gobuster, ffuf, Wireshark, Metasploit, OpenVAS, LinPEAS, OWASP Top 10

Networking: TCP/IP, HTTP/HTTPS, DNS, SSH

Operating Systems: Linux, Kali Linux, Windows

Programming: Python, C, C++, Bash, JavaScript, TypeScript, SQL, Solidity

Embedded Systems: ESP32, Raspberry Pi, 8051, UART, SPI, I2C

Development & Cloud: Git, Docker, PlatformIO, MySQL, Google Cloud Fundamentals
