SUMMARY

I am an ethical hacker and red teamer fueled by a relentless drive to explore, understand, and secure the digital world. With experience across penetration testing, IoT security, and CTF player, I approach every challenge with a mindset rooted in creativity, logic, and precision. My journey through Hack-X Club and ParamSafe has taught me to transform vulnerabilities into opportunities for learning and defense.

WORK EXPERIENCE

Robotics & Innovation Intern

Jan 2025 - May 2025

Worked as a Robotics and Innovation Intern, contributing to the design and development of automation-driven systems and IoT-based solutions. Gained hands-on experience in integrating hardware with software to improve system efficiency, reliability, and security.

PROJECTS

Lightweight IDS using Suricata and Raspberry Pi 5

Built a custom Intrusion Detection System on Raspberry Pi 5 using Suricata, focusing on lightweight deployment and real-time packet analysis. This project strengthened my understanding of network forensics, rule creation, and traffic-based threat detection.

DDoS Simulator

Designed a Python-based DDoS simulation system to evaluate and improve Suricata IDS detection efficiency in controlled environments. Simulated high-volume traffic scenarios to analyze response thresholds, tune rule sets, and strengthen network resilience across IoT and embedded devices.

EDUCATION

2025 - 2028	B.Tech ECE [AI-ML] MIT- World Peace University	
2022 - 2025	Int. B.Tech ECE [AI-ML] MIT- World Peace University	(GPA: 8.06/10.00)
2022	Class 10th Some Board	(79%)

TECHNICAL SKILLS

- | | |
|--|--|
| <ul style="list-style-type: none">• Programming Languages: C, Python, Bash• Web Technologies: HTML, JavaScript, API• Offensive Tools: Burp Suite, Metasploit, Nmap, Hydra, sqlmap, dirsearch, John the Ripper, Aircrack-ng• Defensive Tools: Suricata, Wireshark, Snort• IoT/Hardware: Raspberry Pi, Arduino, | <ul style="list-style-type: none">ESP8266, Sensor Integration, Network Device Monitoring• Platforms & Environments: Linux (Ubuntu, Kali), Windows, Docker, VirtualBox, Raspberry Pi OS• Soft Skills: Problem Solving, Team Collaboration, Technical Writing, Leadership (Hack-X Club), Mentorship, Continuous Learning |
|--|--|

ONLINE COURSES

- **APISec University:** *API Security Fundamentals* (June 2024)
- **Google Cloud:** *Build a Secure Google Cloud Network* (Sept 2024)

OTHERS

- **Hobbies:** Sketching, Cooking
- **Languages:** English, Hindi, Gujarati

DECLARATION

I hereby declare that all the details provided above are true to the best of my knowledge and belief.

Location: Pune, Maharashtra (India)
